## A Tor Hopping Hash with Celestial Undertones

The best thing about the evening was the weather and the views which were both wonderful!

The Hash?

Well ... it was a bit long ... and were it not for the hospitality of the Prince of Wales there might have been lots of rumbling tums ... it was rewarding to reach the top (well nearly) of a number of tors ... and some relief that the tussocks were at their winter low ... every single long hasher your scribe talked to complained of bursting lungs as the sides of North Hessary Tor were scaled ... this was even described as a tor too far!!

I understand that Dogcatcher started the hash with a stylish gymnastic performance. A misjudged leap over the wall from the carpark was greeted by a steeper descent than anticipated, requiring a double tumble turn to avoid a crashing heap on the other side. There were some reports that this episode was repeated only seconds later as a second wall was scaled ... but I have it on good authority that this was plain sailing!!!

There was also a tale from Grandpa, Turd and Barney ... from different locations (pub, on run, car park respectively) ... of an **ENORMOUS** shooting star. Did you see it?

The celestial theme continued as Charlotte revealed an interest in stargazing and Kate ... soon to be named ... Allen (aka Saucerers) showed us how to use her app to recognise the planets ...

**Star Walk** is the most beautiful stargazing app you've ever seen on a mobile device. It will become your go-to interactive star chart of the night sky, following your every movement in real time and allowing you to explore over 200,000 celestial bodies with extensive information about stars, planets, satellites, and constellations that you find. Even if you've never been that into astronomy, Star Walk will surprise you.

....and its even available on Android!!!

**TORCHES** .... Don't forget them ... You can't guarantee that the hare has had too much time on his/her hands and ended up laying an hour and half + trail ... so until it stays light until at least 21:00 hours **BRING YOUR TORCH** ...

... Unless you're dogcatcher ...

Or ... unless you've been practicing ... <http://www.wikihow.com/See-in-the-Dark> ... believe it or not you can train your eyes ...could this make an interesting hash event?

BARNEY?

Barney spent a long time in the pub mithering on about the fickle nature of some of the elected Committee members who had thrown in the towel

Did you know we have a growing family affair in the hash ... Treve and his two brothers ... and Mum ... and various other relations ... a number of whom are also on the naming waiting list ....

Oops ... just fell asleep hunched over the keyboard ... lets see if we can get this finished ...

**And to conclude:**

*Why does it take pirates so long to learn the alphabet?*

Because they can spend years at C!

*Why do seagulls fly over the sea?*

Because if they flew over the bay, they'd be bagels!

OoooH AaaaaRRRRR ... ON ON

*See you at The Britania ....*
